

RUSHIKESH VASANT KUCHEKAR

Java Developer | Backend Software Engineer

Pune, Maharashtra, India • +91 7218484601 • rushikeshkuchekar91@gmail.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Java Developer with 4+ years of experience designing and deploying scalable, high-availability backend systems for the BFSI sector using Java (Java 8+), Spring Boot, and Microservices architecture. Proven ability to optimize system performance by 15–20%, harden application security (AES encryption, Vault integration), and deliver production-grade RESTful APIs under high-volume traffic. Experienced with Docker, Kubernetes, CI/CD pipelines (Jenkins, Tekton), and SQL/NoSQL databases. Adept in Agile (Scrum) environments with a strong record of cross-functional collaboration.

TECHNICAL SKILLS

Languages: Java (Java 8+), Node.js

Frameworks & Libraries: Spring Boot, Spring Framework, Spring Security, RESTful APIs

Architecture: Microservices Architecture, Event-Driven Design, API Gateway Patterns

Databases: MongoDB (NoSQL), SQL, MySQL

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Tekton, Git, GitHub

Security: AES Encryption, HashiCorp Vault, Secure HTTP Headers, OAuth2

Tools & Platforms: Jira, Metabase, Postman

Concepts: Multithreading, OOP, Exception Handling, JUnit, Cron Jobs, Agile (Scrum), Production Support

PROFESSIONAL EXPERIENCE

Turtlemint — Software Engineer

Pune, Maharashtra, India | October 2022 – Present

- Architected and delivered 10+ production-grade RESTful APIs using Java and Spring Boot for high-volume BFSI policy sales and renewal workflows, sustaining high availability under peak production traffic across clients including YES Bank, DBS Bank, and Bank Dhofar.
- Spearheaded a MongoDB version upgrade initiative, resolving driver compatibility issues and optimizing query performance by 15–20%, achieving zero critical downtime throughout the migration lifecycle.
- Engineered a REST API-driven policy renewal module using Spring Boot and Microservices architecture, reducing end-to-end renewal processing time by 50% and improving workflow efficiency across policy operations teams.
- Fortified application security by implementing AES encryption, secure HTTP headers, and HashiCorp Vault-based secret management, ensuring BFSI compliance standards and reducing credential exposure risk.
- Optimized backend microservices by identifying and eliminating redundant caching layers, reducing infrastructure overhead and improving average API response time by ~15%.
- Developed and scheduled cron-based background jobs in Java (Spring Scheduler) to fetch and synchronize policy data from insurer systems in real time, improving data consistency across downstream integrations.
- Built business intelligence dashboards using Metabase, enabling real-time KPI tracking for stakeholders and reducing manual reporting effort by 3–4 hours per week.
- Collaborated in Agile (Scrum) ceremonies — sprint planning, daily stand-ups, code reviews, and retrospectives — consistently delivering features within sprint timelines.

Certificate of Excellence — Turtlemint (January 2025)

Recognized for outstanding contributions to BFSI client projects (YES Bank, DBS Bank, Bank Dhofar), demonstrating excellence in delivery, system reliability, and cross-team collaboration.

EDUCATION

Bachelor of Engineering — Electronics and Telecommunication Engineering
